WOW
Carrying sheet with 10 handles and footrest

The carrying sheet WOW, is a device intended to transfer patients from the stretcher to the bed or for transport from the rescue place to the stretcher for patients who do not have spinal injuries.

Specific Characteristics
Manufactured with fireproof materials
Easy to clean thanks to the use of non-absorbent fabrics
Reinforced nylon webbing to ensure high resistance and durability
The width of the tape used for the handles, ensures an easy grabbing increasing safety
On the patient side there are handles dedicated to the patient that make him more collaborative and increase safety
The special shape, offers high lateral containment during transport
Footrest adjustable in 2 positions to increase longitudinal containment
The supplied adjustable shoulder straps ensure a better distribution of the load on the rescuer
The longitudinal aluminium rods, are removable through the dedicated holes and can be folded into 3 parts. When inserted, they increase the rigidity of the sheet, allowing to distribute the load over a wider surface and allowing to limit the flexion of the device
The device allows also the transport of the patient in sitting position
Requires low storage space
